

As a group we did a work distribution. Liana Darbinyan did all the word scrapings from three pages ([encyclopedia.am](http://encyclopedia.am), [grapaharan.org](http://grapaharan.org), [dictionary.advandcash.biz](http://dictionary.advandcash.biz)) for spelling checks and synonym suggestions. Adine Ghukasyan worked on the website (interface with input text, checking button and logo).

We took commas, edits1 and suggestions methods from the last year students, we worked on each of them separately. Adine wrote shaxkap and deranun methods, Liana wrote capitalize and synonyms. Liana combined all the methods and put them together. We worked on the combined code together and made it work correctly. And in the end we made the presentation .
