Tool to Help You Succeed!

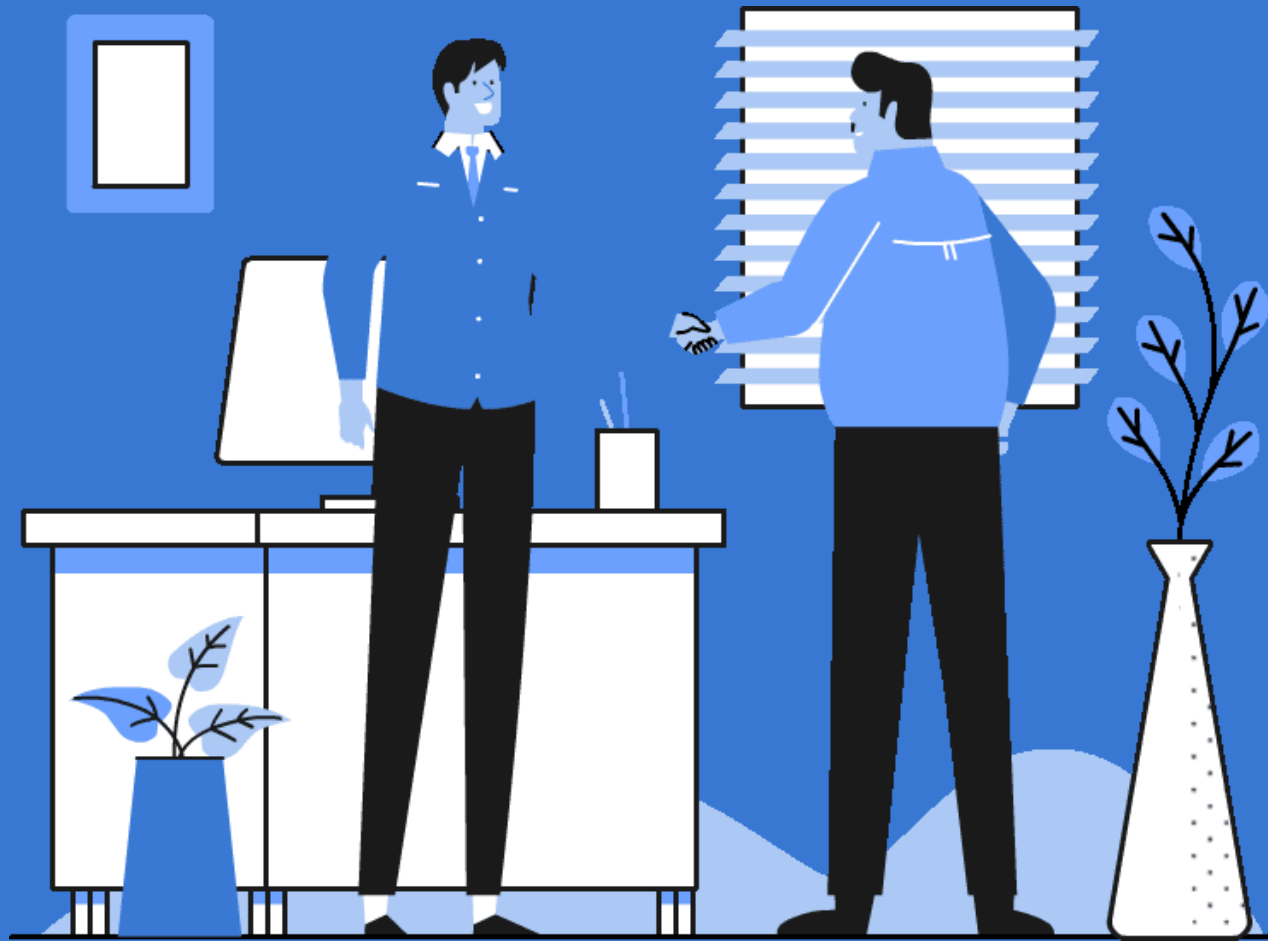

We all are having issues with the grammar....

**Here comes
Grammarly for
Armenians.**

Problems

What do we suggest?

People who are as passionate as you in literate writing should have a look at the website called [ArmGram!](#)

Scraping

435,000+ words for the spelling and grammatical check

Synonyms of 4000+ words with different meanings

Logical Code

Code capitalizes the inputted text, finds spelling errors and suggests words from the text files to replace them with, counts the demonstrative pronouns and in case of many occurrences suggests to change them, and suggests synonyms for each word it finds any.

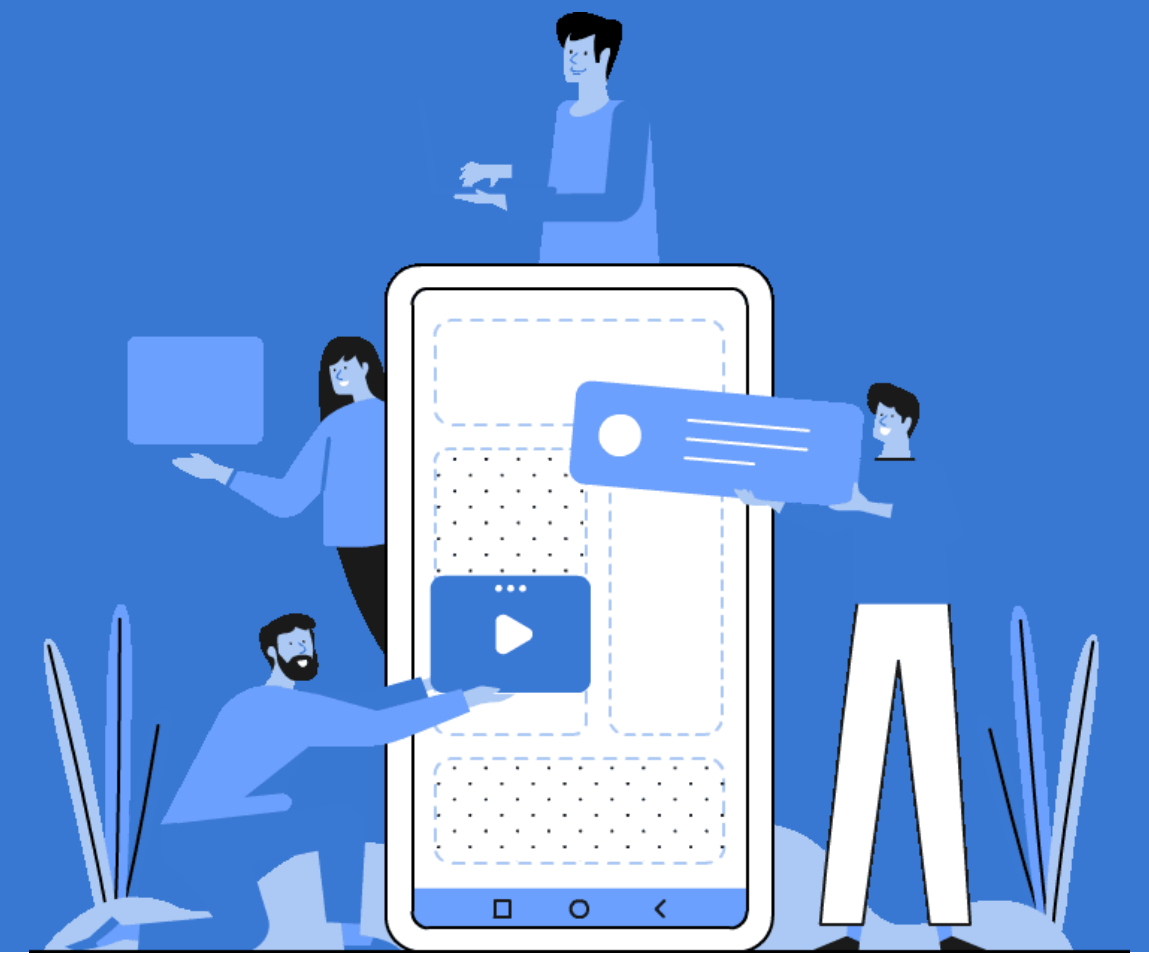

How it was created

Webpage

Takes input from the user in text form, and after clicking the 'Ստուգել' button it runs the logical code and shows the corrected text in as the output.

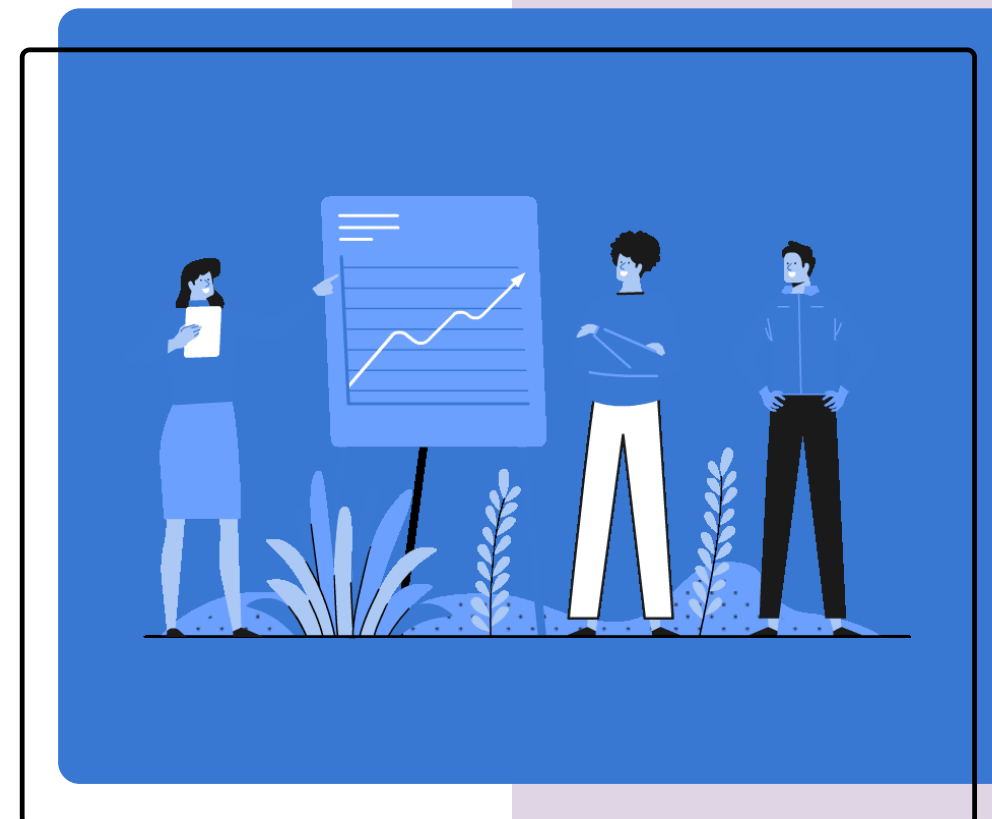

How it works
